What our customers say ...

"We hardly notice any difference compared to new formwork panels"

Christian Jörg
ARAS BAU GmbH & Co. KG
Memmingen/Germany

Why did you opt for a MEVA Original Used Formwork product?

First of all, because of the purchase price, which is impressively low compared to the cost of new formwork. Then, because MEVA is a regional manufacturer in which we have great confidence. The used formwork undergoes expert, high-quality reconditioning. And, not least, because of the sympathetic and trustworthy impression conveyed by your field representative.

How do you rate the quality of the reconditioned alkus facing?

We are very satisfied and impressed by the refurbishment performed by MEVA. We hardly notice any difference compared to new formwork panels.

What impact did the formwork have on the quality of the concreting results?

We are glad we opted for MEVA. For us, formwork assembly speed and dimensional accuracy are crucial factors. MEVA's formwork systems meet these criteria to our complete satisfaction.

Would you opt for MEVA Original Used Formwork again and recommend it to others?

Yes, we've already recommended MEVA and I'm sure it won't be the last time. High quality, flexibility, cost-effectiveness, proximity to our sites and a warm relationship are the key factors behind our successful partnership with MEVA, both now and in future. All of us at ARAS BAU GmbH & Co. KG wish to thank you for the enjoyable and dependable teamwork.

Whether StarTec or Mammut panelised formwork, MEP shoring tower planking, tubular steel props or alkus facings – the latest offers are posted at www.meva.net/used-formwork

Pioneer and trendsetter

More with MEVA

Formwork. Simple. Smart.

A lot of things that are now considered to be standard in the formwork industry were developed by MEVA in Haiterbach. As a trendsetter for the entire industry, we work day in and day out with great élan to make formwork even safer, more efficient and easier to use for the end user. For us, the excellent quality of our products and technology is a matter of course.

We are independent, family-run and committed to the values of a medium-sized company in everything we do. That is why our customers may rightly expect not only technologically superior products but also comprehensive, personal commitment to projects all around the world.

Complex special formwork or economical standard formwork: Our experience and wide range of products make us a service partner with strong consulting skills, even for the sophisticated challenges construction professionals have to master nowadays.

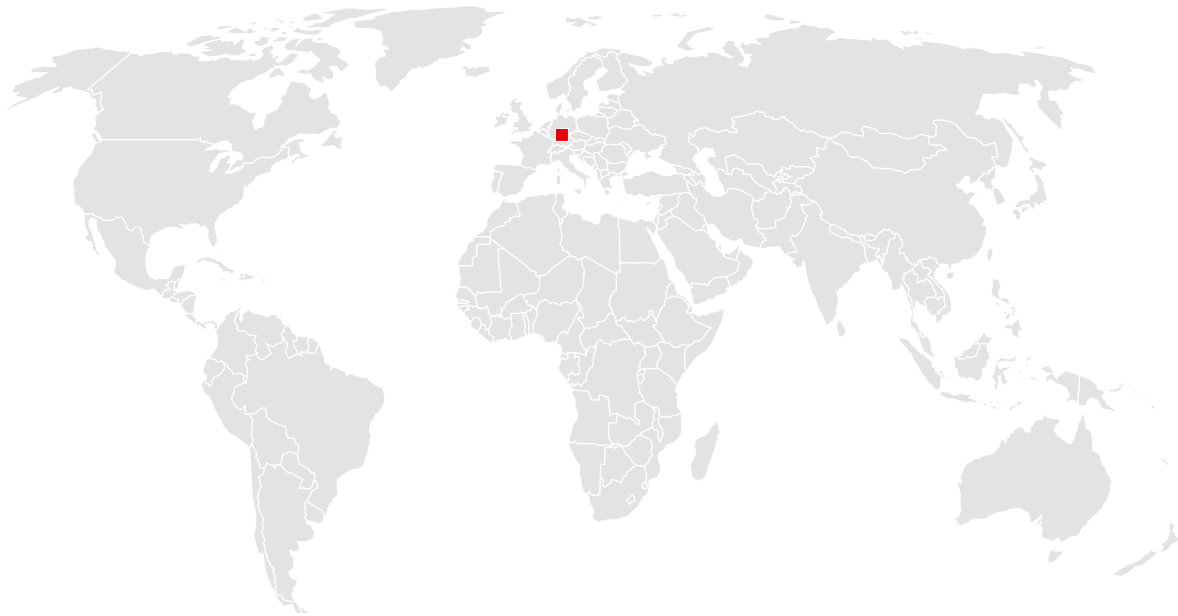

*Formwork.
Simple. Smart.*
